

PREVENTABLE

TREATABLE BEATABLE

RAISE AWARENESS SAVE LIVES

Did you know colorectal cancer is the second-leading cause of cancer-related death, and claimed over 56,000 lives last year alone? Many of these deaths could have been prevented. Learn the facts, share the facts and save lives:

COLORECTAL CANCER IS:

PREVENTABLE – through regular screening, a healthy diet, exercise, moderate alcohol consumption and if you smoke, quit today! Talk to your doctor about when you should start regular screenings.

TREATABLE & BEATABLE – unlike many other cancers, colorectal cancer can be treated when caught early. But don't get to this point – talk to your doctor, get screened and stay healthy.

For more information visit the National Colorectal Cancer Round Table Web site at www.nccrt.org.

National Colorectal Cancer Round Table is a national coalition of public, private and voluntary organizations whose mission is to advance colorectal cancer control efforts by improving communication, coordination and collaboration among health agencies, medical-professional organizations and the public.
