"We are the Stony Brook University Physician Assistant Class of 2018! We are a really close group and from time to time, plan days where we all wear the same color or pattern. We decided Dress in Blue Day was the perfect day to wear blue to class! We got involved because as future health care providers, we see the importance of routine screening and healthcare maintenance. Personally, my grandfather passed away from colon cancer and I have worked in Gastroenterology and Colorectal Surgery doing research on colon cancer and Inflammatory Bowel Disease so this is where my passion lies."
